

Regulatory Support: Food, Dietary Supplements & Animal Feed

Intertek has an unparalleled understanding of the intricacies and processes of regulatory agencies and requirements not only to develop a successful strategy, but also to follow through with the sub-mission process and act as a liaison with regulatory agencies as required.

Keeping up with the ever-changing regulatory landscape and the differing pre-market requirements for the food, supplement, and animal feed industries is challenging. If your product falls into more than one regulatory category in multiple jurisdictions, the challenges are even greater. Developing a well thought-out regulatory strategy is key to identifying the most efficient route to market for any product, whether you wish to gain approval in one or one hundred jurisdictions.

Your challenge

To successfully enter the global food, supplement, and animal feed marketplace, a strong regulatory strategy is needed. This strategy will outline the scientific and technical data requirements for each market of interest, identify any data gaps that will need to be addressed prior to submission, consider time lines for approval, and set forth the best approach to ensure timely and successful product approvals.

Our solutions

Intertek Assuris offers the expertise necessary to provide reliable advice in the areas of food, supplements, and animal feeds including pet foods.

Our services include:

- Designing regulatory strategies to meet international requirements and pre-empt regulatory concerns in one or multiple jurisdictions;
- Preparing submissions, from pre-meeting packages and post-marketing changes, to complete dossiers for new active substances for regulatory agencies worldwide;

- Liaising with regulatory agencies, including facilitating meetings and providing independent, third-party critical advice on and responses to regulatory issues;
- Developing global regulatory monitoring programs to ensure that products remain compliant in changing regulatory climates; and
- Designing, placing and monitoring pre-clinical and clinical studies to ensure completeness of the safety and/or efficacy evidence base for regulatory submissions.

The Intertek advantage

Intertek Assuris consultants have been successfully delivering expert advice for over 25 years. With more than 80 professionals on staff, including many internationally-recognized scientists, regulatory specialists, and toxicologists, Intertek Scientific & Regulatory Consultancy is unparalleled. Our success record speaks for itself—more than 75% of our projects come from existing clients or direct referrals. Our value lies in our successful outcomes and reduced time to market.
